ROYAL

The ROYAL range has combined a wide range of materials and systems to become an integral part of the internal architecture for every residential or professional area.

The features of the ROYAL range make the internal door "invisible" since it is an inseparable part of the structure.

ELEGANCE

The high level of aesthetics and the perfect finish are a feature of ELEGANCE range which bears the mark of recognised designers and offers an excellently upgraded design.

The sleek lines in this range are enhanced by the material's relief texture, which adds a special feature to the interior door.

ELEGANCE STAR*

Doors in ELEGANCE STAR* range are characterised of very high fire resistance compared to regular ones, due to containing phenolic.

HANG-SLIDE

Make your interior doorway a focal point with this range with rolling track system. Not only is a rolling track system perfect way to save space it also provides a harmonious blend of the old and new creates an excellent conversation piece in any home.

The rolling track system is easy to assemble and install over existing openings without making alterations to finished opening.

DESCRIPTION

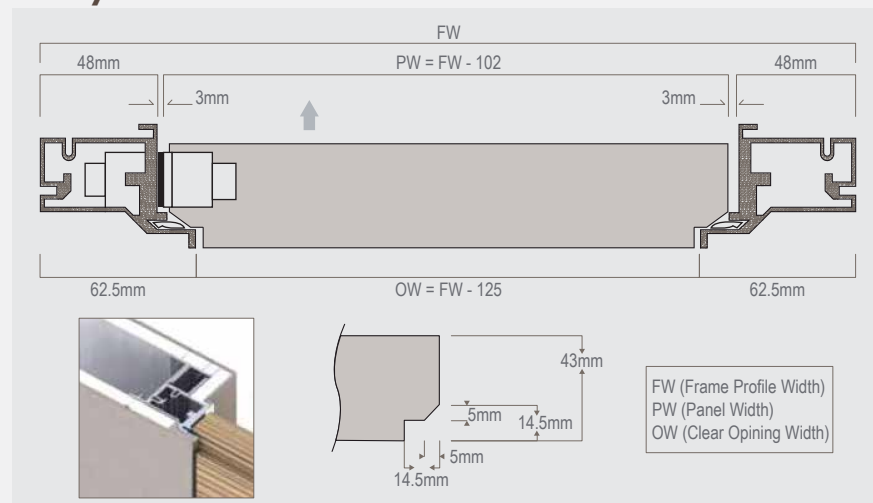

Our internal door is daring and bold. The innovative use of high pressure laminates opens your world to colours and textures never seen on doors before. The high pressure laminate door face requires no painting, staining or finishing, and is tough and durable.

You can almost feel the grain in our stunning collection of timber-look finishes that combine the beauty of timbers from around the globe with high technology, hard wearing laminated panels. Or, for a more subtle feeling, select a soft, gentle matt finish that tones things down and gives the built space a more classic feeling. If you want your door to shine, choose from our rich, reflective gloss collection that includes a palette of solid colours as well as timber finishes.
