

PERFECTDOORS
LOCKERS

L O C K E R S

Perfect Doors Lockers are the most durable lockers on the market today. Our HPL compact boards have a unique non-porous surface that eliminates the ability for bacteria, molds and mildew to grow, making it perfect for facilities that experience high moisture or wet areas. Our Lockers are water resistant, graffiti and scratch resistant. With many color options and patterns, we make it easy and simple to design custom locker rooms.

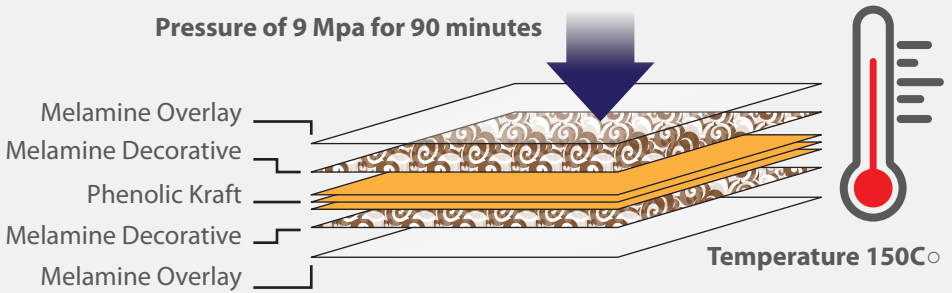

Full Service

- Identification of the project requirement
- Design advisory
- Product and solution proposal
- Specification writing
- Project estimation
- CAD layout drawings
- Delivery
- Instlation
- After sales support
- Warranty
- Maintenance
- Complementary Products and services

Compositios

The core is made up of layers of cellulose fibres impregnated with phenolic resins; the surface by one or more layers of cellulose fibres impregnated with thermosetting resins, providing the decorative function. The manufacturing process involves the combined application of heat (150 °C) and high pressure (9 MPa) in multi-daylight presses in which resin polycondensation takes place.

Specifications

Easy to clean

Environmentally friendly

Excellent hygienic properties

Easily machined

Self-supporting properties

Dimensional stability and flatness

Anti-static

High resistance to water and steam

Suitable for contact with food stuff

Mechanically sturdy

Wide range of colors and designs

High resistance to chemicals and organic solvents

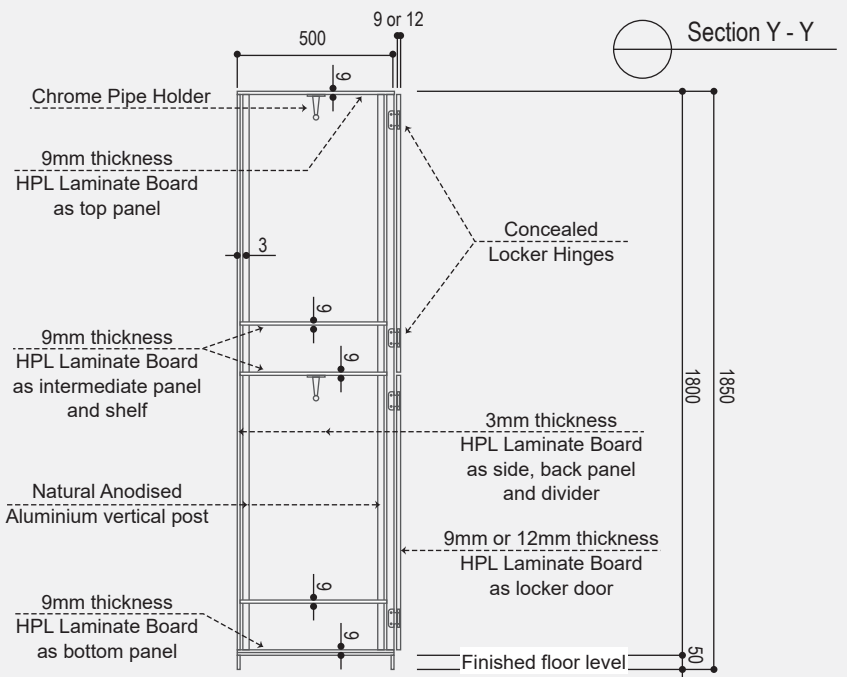

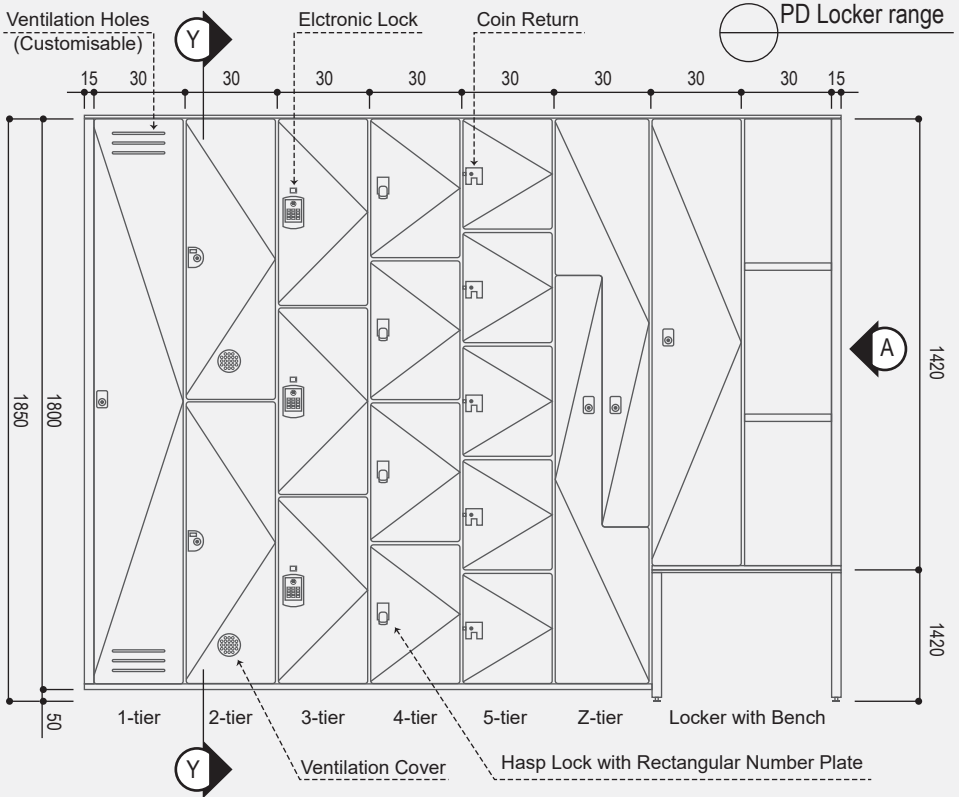

Excellent performance to fire, smoke and toxic gases

Colors and Patterns

Technical Drawings

A black and white photograph of a long, curved row of white lockers in a school hallway. The lockers are arranged in a semi-circle, and each locker has a small handle and a ventilation grille. The hallway floor is visible in the foreground, and a circular light fixture is on the ceiling.
